

AI-FDS Student Investigation Brief

Plain-language findings, priority actions, and traceable technical evidence

Case: AIFDS-EDU-SAMPLE-001	Generated: 2026-07-26 23:19:38 (Asia/Kuala_Lumpur, GMT+08:00)
Purpose: Educational review of email phishing, phone-based social engineering, and carrier lookup evidence.	Evidence reviewed: 3

Investigation Summary

3 Evidence	1 Immediate	1 Review	1 No immediate action
----------------------	-----------------------	--------------------	---------------------------------

What should I do next?

1	Pause contact and do not send money, credentials, OTPs, files, or remote access. Stopping the interaction limits further exposure while the evidence is verified.	Immediate
2	Do not disclose the code or password; change exposed credentials and contact the account provider. OTPs and passwords can enable account takeover.	Immediate
3	Change the password from a trusted device, revoke sessions, and enable multi-factor authentication. Shared credentials should be treated as compromised.	Immediate

Evidence Review

Evidence 1 - Email		Immediate Action Required
Result: Suspicious	Evidence score: 92.0%	Time: 2026-07-26 20:45:00
Source: student-services-alert.eml	Analysis method: Email model consensus	Score meaning: Average suspicious risk
Why: Multiple email models agree that the message resembles phishing. The strongest signals are an OTP request, a forced deadline, and a look-alike sender domain. Key indicators: OTP request, Urgency and account suspension threat, Sender-domain mismatch Relevant excerpt: Reply with the six-digit verification code. Next action: Pause contact and do not send money, credentials, OTPs, files, or remote access.		

Evidence 2 - Transcript		Review Required
Result: Likely social-engineering script	Evidence score: 78.0%	Time: 2026-07-26 20:48:00
Source: support-call.txt	Analysis method: Transcript multi-model analysis	Score meaning: Behavioral concern score
Why: The transcript combines authority impersonation, an urgent transfer request, and secrecy. Those patterns warrant independent verification before any action. Key indicators: Authority impersonation, Payment pressure, Secrecy request Relevant excerpt: Do not tell branch staff. Next action: Stop payment and contact the bank or payment provider through its official fraud channel.		

Evidence 3 - Phone		No Immediate Action
Result: No listed report; identity unconfirmed	Evidence score: 28.0%	Time: 2026-07-26 20:52:00
Source: +60 12-345 6789	Analysis method: Carrier metadata + reputation rules	Score meaning: Phone evidence concern score
Why: The lookup found ordinary carrier metadata and no matching community report. This lowers immediate concern but cannot verify the caller or rule out spoofing. Key indicators: Carrier metadata available, No community scam report matched, Caller identity not verified Relevant excerpt: Malaysia mobile number; no matching community report; ownership not verified. Next action: Call the organization using a number from its official website or trusted statement.		

Combined Investigation Findings

Finding	Evidence	Priority
Authority impersonation	Transcript #2	Review
Caller identity not verified	Phone #3	Informative
Carrier metadata available	Phone #3	Informative
No community scam report matched	Phone #3	Informative
OTP request	Email #1	High

Visual Evidence Summary

Interpretation note: email probabilities, transcript/audio risk signals, and phone evidence scores use different methods and are not directly comparable.

Reviewer Note

Treat the output as decision support. Verify people and organizations through independently sourced official channels before taking action.

Technical Appendix

Investigation-specific output is grouped under its evidence record. Shared training evaluation metrics appear once in a separate reference section.

Evidence-Specific Supporting Visuals and Data

Evidence 1 - Email		Immediate Action Required
Result: Suspicious	Source: student-services-alert.eml	Time: 2026-07-26 20:45:00

Supporting Visuals and Data

1. [Table] Email Indicator Evidence

Scan-specific findings from the email investigation.

Indicator	Observed evidence	Impact
OTP request	Reply with the six-digit verification code	High
Urgency	Account closes in 15 minutes	High
Sender mismatch	look-alike student-services domain	High

Evidence 2 - Transcript		Review Required
Result: Likely social-engineering script	Source: support-call.txt	Time: 2026-07-26 20:48:00

Supporting Visuals and Data

1. [Table] Transcript Scam Indicators

Timestamped scan-specific transcript findings.

Time	Category	Excerpt	Priority
00:12	Authority impersonation	I am calling from your bank fraud department	High
00:34	Payment pressure	Move the funds to the safe account now	High
00:51	Secrecy	Do not tell branch staff	High

Evidence 3 - Phone		No Immediate Action
Result: No listed report; identity unconfirmed	Source: +60 12-345 6789	Time: 2026-07-26 20:52:00

Supporting Visuals and Data

1. [Table] Phone Carrier and Reputation Lookup

Scan-specific carrier and community-reputation output.

Field	Result	Meaning
Carrier	Example Mobile Berhad	Network metadata only
Line type	Mobile	Does not establish ownership
PenipuMY match	No matching report	Absence of a report is not proof of safety
Country	Malaysia	Numbering-plan metadata

Shared Model Reference Metrics

These are model evaluation references, not measurements produced by a single investigation.

1. [Chart] Performance Metrics

Used by: Evidence 1 - Email

Email Metrics tab 1 of 3: shared model precision, recall, and F1.

Model	Precision	Recall	F1
Naive Bayes	92	90	91
Logistic Regression	95	93	94
SVM	96	95	95.5

2. [Table] Performance Metrics data

Used by: Evidence 1 - Email

Exact values displayed beneath evaluation tab 1 of 3.

Model	Precision	Recall	F1
Naive Bayes	92	90	91
Logistic Regression	95	93	94
SVM	96	95	95.5

3. [Chart] Confusion Matrix Heatmap

Used by: Evidence 1 - Email

Email Metrics tab 2 of 3: shared held-out classification counts.

Actual	Predicted legitimate	Predicted suspicious
Legitimate	1842	43
Suspicious	61	1054

4. [Chart] ROC-AUC Curve

Used by: Evidence 1 - Email

Email Metrics tab 3 of 3: shared decision-threshold performance.

Model	AUC
SVM	0.97
